SUMMARY

Backend-focused software engineer with Java & Spring Boot expertise. Built REST APIs and scalable systems; also experienced in WordPress, Laravel, and Next.js.

PROJECT HIGHLIGHT

Quiz Management System (Spring Boot) - Github

- REST API with JWT authentication & role-based access.
- Teacher/admin: quiz CRUD, question/option management.
- Student: quiz attempts, scoring, results.
- **Tech:** Spring Boot, JPA/Hibernate, MySQL, GlobalExceptionHandler.

Hospital Management System (Spring Boot) - Github

- Backend modules for appointments, doctor/patient records, prescriptions.
- Built authentication, role management, and reporting features.

PROFESSIONAL EXPERIENCE

ThemeJunction – WordPress Developer (Contract) | Oct 2024 – Mar 2025

- Built **custom Elementor widgets and reusable components**, reducing page-building turnaround time by ~30%.

Manifests Ltd. – Fullstack Engineer | May 2024 – Aug 2024

- Developed a **car booking web app** with Next.js, optimizing API calls and reducing load times.
- Improved performance of production Next.js applications, boosting Lighthouse scores (70 → 90+).

Noor Software Lab / WordPress Roles — Fullstack / WordPress | Feb 2022 – May 2024

- Built **POS modules** (inventory, sales, accounting, reporting) with Laravel, reducing manual bookkeeping for clients.
- Created **custom Gutenberg blocks** and integrated WordPress with **Zendesk** and third-party tools.

ISDT, Southeast University – Junior Programmer | Jan 2019 – Aug 2020

- **Developed backend modules with Spring Boot & JPA/Hibernate for course and curriculum management with approval workflows.**
- **Implemented grading upload and approval workflows via REST APIs, reducing faculty processing errors.**
- **Built student services features: admit card download, financial ledger view, PDF reports, digitizing manual processes.**

EDUCATION

B.Sc. in Computer Science & Engineering, Southeast University — CGPA: 3.4 (2019)
